

## Sensormatic Ultra•Tag™ Platform – Ultra•Tag™ MT

Sensormatic is proud to introduce the Ultra•Tag® platform, a portfolio of tags developed to address a wide variety of security applications. This new platform was designed through extensive customer input; and is based on high security, ease of application and ease of removal. This new EAS reusable hard tag platform provides effective solutions for protecting broader lines of merchandise, while maintaining the high standards of security for which Sensormatic is renowned.

The Ultra•Tag® MT is one the first tags to be released from the Ultra•Tag® platform. It is a multi-purpose tag designed to secure a wide variety of products ranging from bottled wines and spirits to sporting goods.

This versatile tag is aesthetically designed to minimize the impact to merchandise presentations while allowing the greatest number of protected items to be displayed.

The tag is easy to apply and remove, helping to maximize throughput at the point-of-sale (POS).

This tag provides the ultimate in security, ease of use and technology.

## Features:

- **Sleek aesthetic design.** Minimizes the impact to merchandise on display and eliminates the need to realign shelving to accommodate the addition of the security device.
- **Versatile.** This tag is adaptable to a wide variety of merchandise it will accommodate items with a circumference ranging from 27mm (1.06in) to 37mm (1.44in).
- **Defeat resistant design.** Rigid ABS plastic housing coupled with a multi-strand steel cable nylon strap combine to make a formidable security device to protect high risk, high value items.
- **Quick and easy application and removal.** Ease of application and speed of removal improves front-end checkout efficiencies and customer satisfaction.
- **Small profile decoupler.** Allows retailers to maximize counter space at the POS. Features include a security lock to prevent unauthorized use.

### Product Compatibility

The Ultra•Tag® platform is compatible only with the Ultra•Tag® decoupler. This small-profile detacher is easy to use and can be mounted directly to any Point-of-Sale (POS) set-up. It may be secured directly to the counter top or recessed into the counter. The compact design allows customers to maximize valuable counter space at the POS. Features include a security lock to prevent unauthorized use.
